The CIO is IBM's Centralized IT Department

IBM

A man with glasses and a beard is smiling while sitting at a desk in an office. He is wearing a light-colored button-down shirt. In the background, a woman is blurred, working at another desk. The entire image has a blue tint. The text is overlaid on the bottom left of the image.

The CIO owns IBM's IT strategy and provides the tools, workstations, devices, and infrastructure that IBMers use to do their jobs every day.

“

Every minute spent struggling with an IT system is a minute of time not spent on delivering value for IBM and our clients.

- Fletcher Previn
CIO, IBM

CIO Domains

CIO is organized into 10 domains, each with their own mission and executive leader.

Project Selection Process

2017 – June 2020

■ Challenge

No documented criteria;
decisions felt mysterious

■ Challenge

Queue grew very long with unacceptable wait times

■ Challenge

Often missed opportunities
for meaningful UX impact

■ Challenge

Designers often stretched
too thin

■ Key Challenge

Uncertainty as to whether we were making the right decisions

What we sought to achieve

Given our ***obsession with the IBMer experience*** and our desire to positively impact IBMer productivity, it is ***extremely important that we allocate our scarce UX Design & Research talent to the projects that have the greatest impact*** on IBMers' work experience.

**Which
projects?**

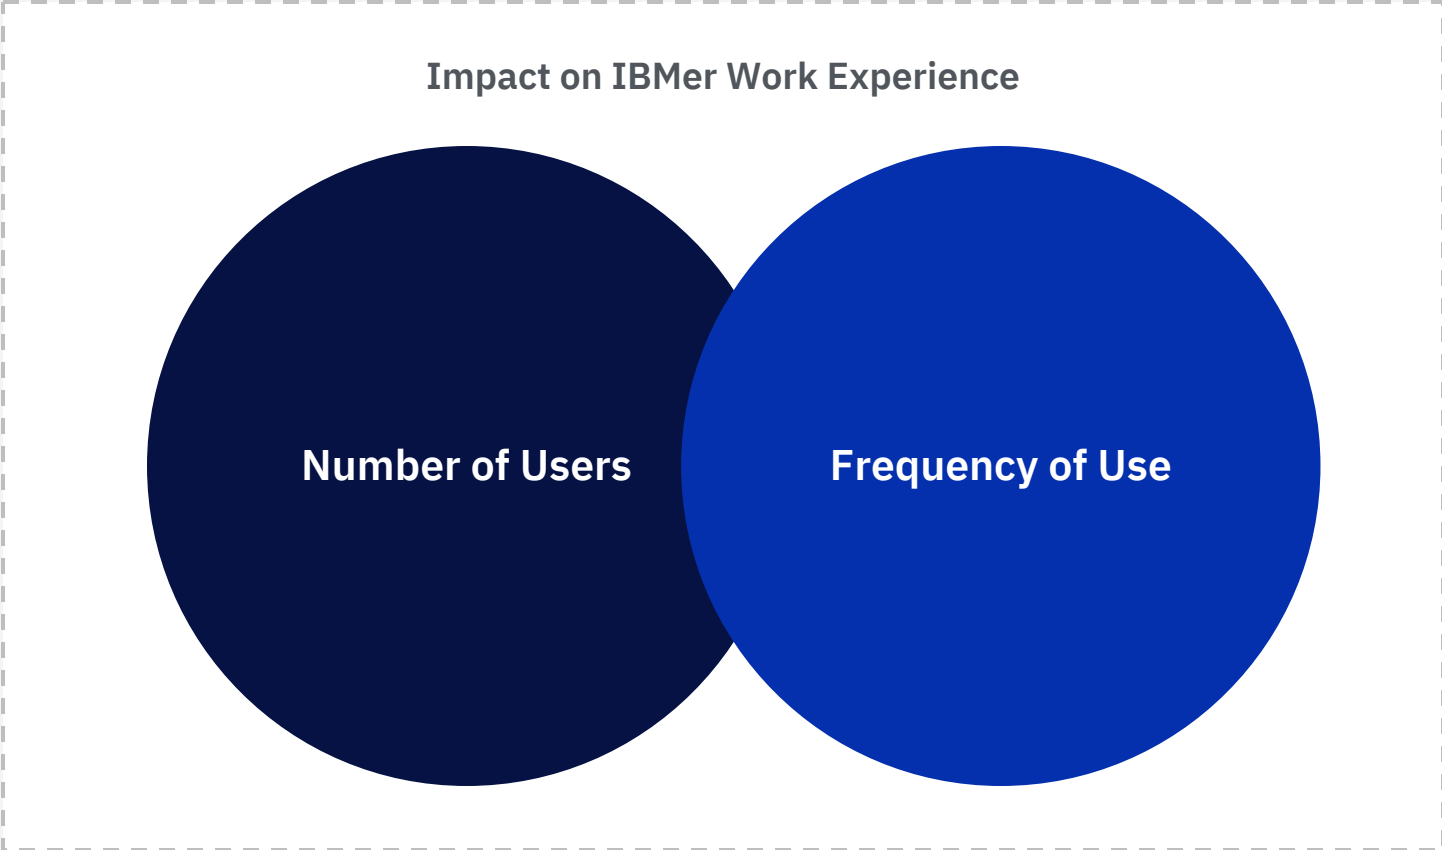

Design Staffing for Impact

IBM | CIO Design

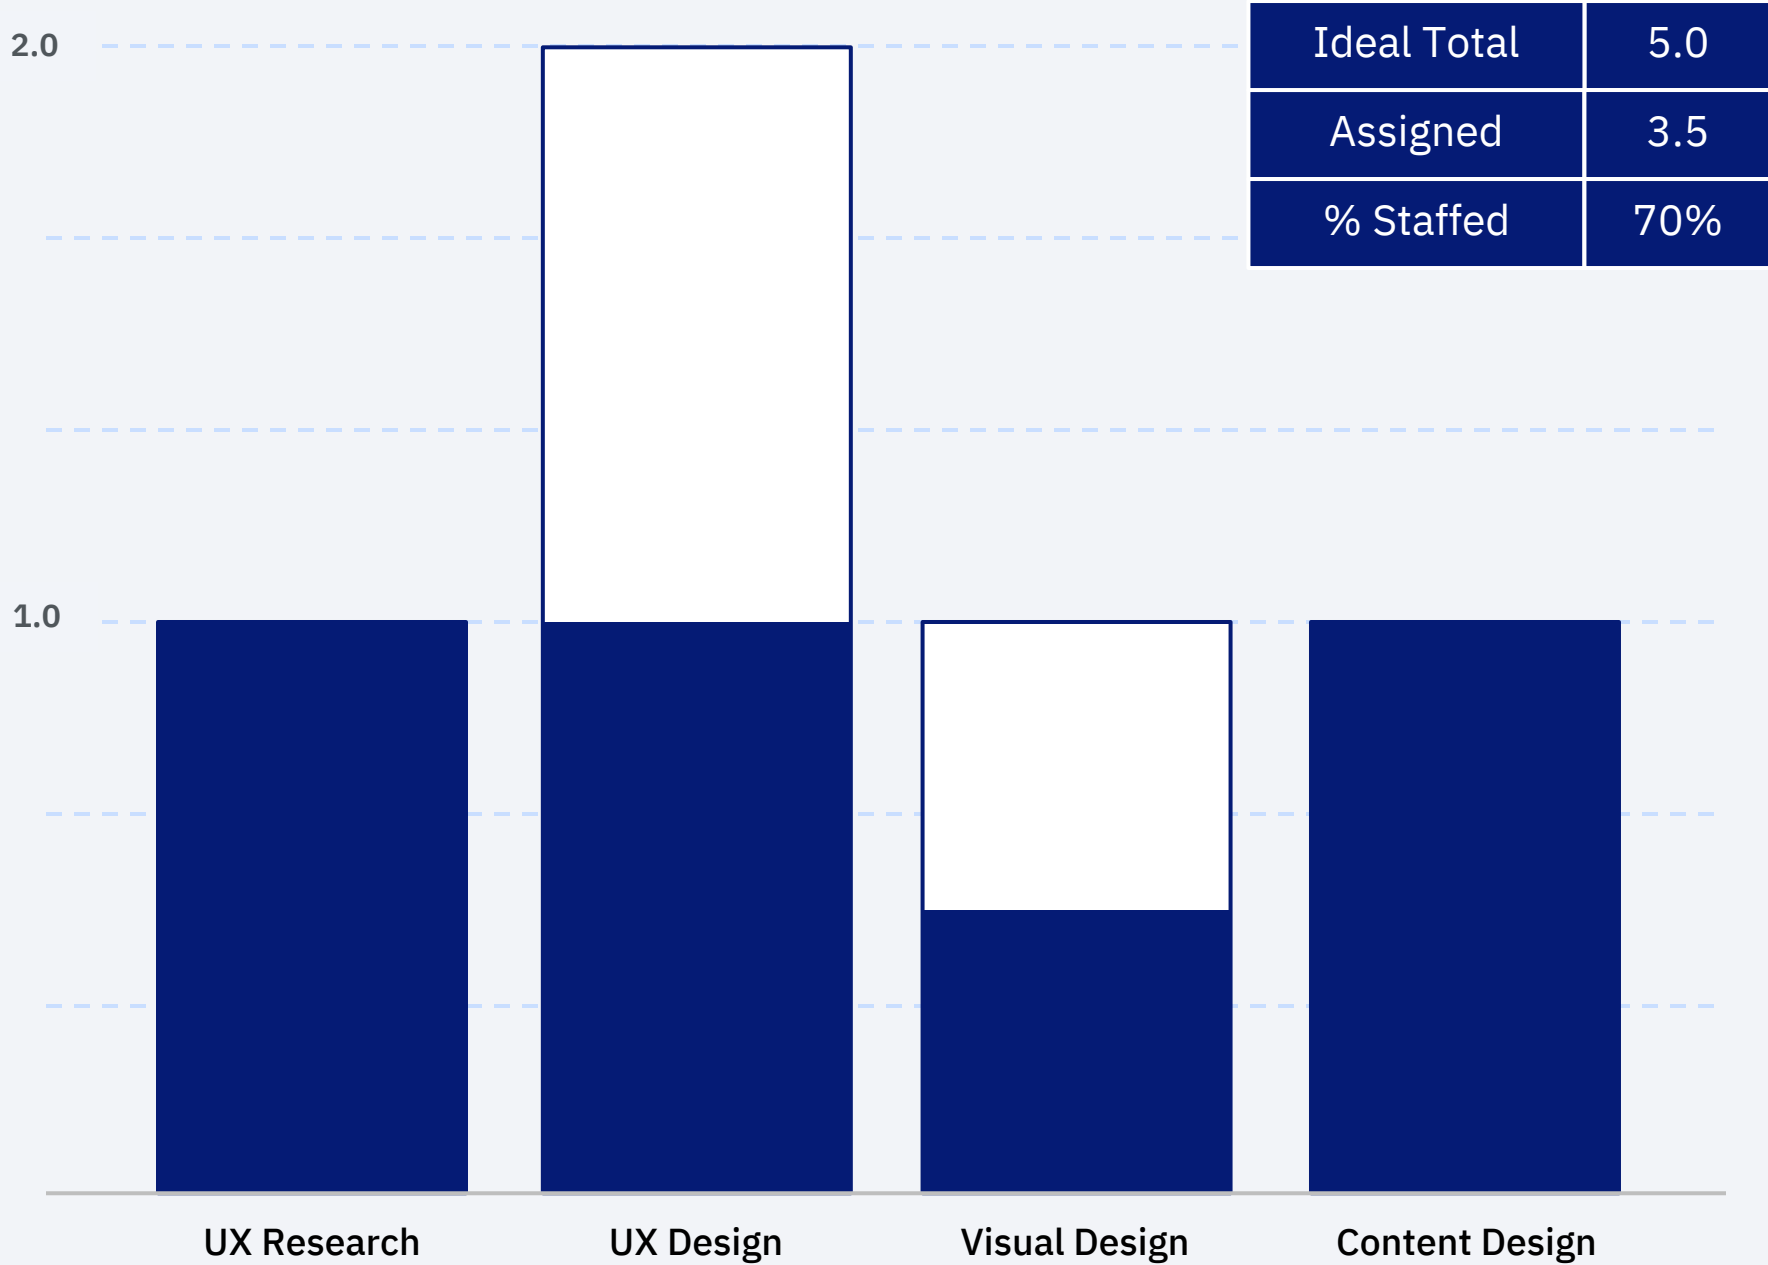

How do we determine priority?

How do we determine priority?

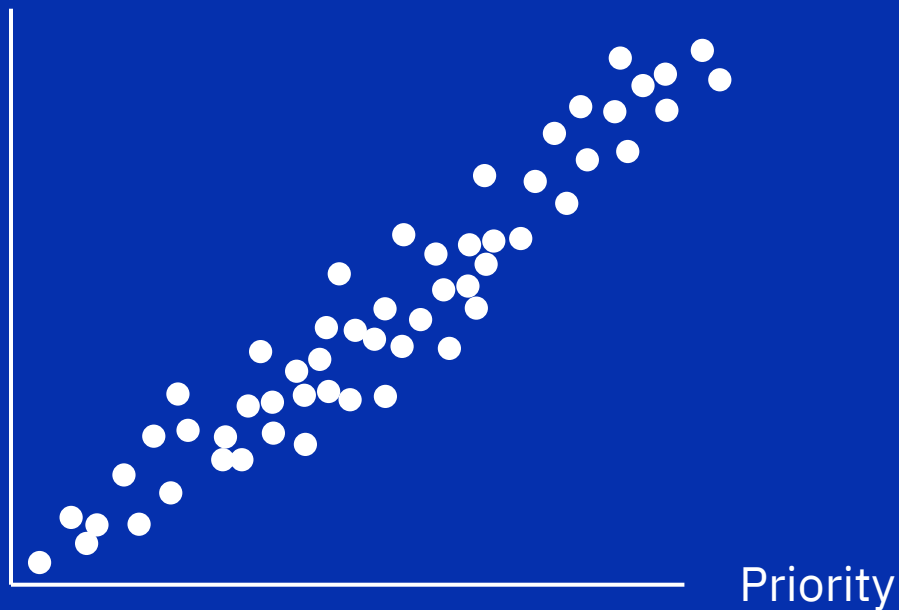

% Staffed

The Desired Relationship

The higher the priority, the more important it is that we fully-staff

% Staffed

The Design Staffing Score

Based on the correlation between project priority and the degree to which the project is staffed

Results of our initial investigation

Priority distribution

Baseline score

Actions, improvements, & benefits

Immediate transitions

Higher Priority

Lower Priority

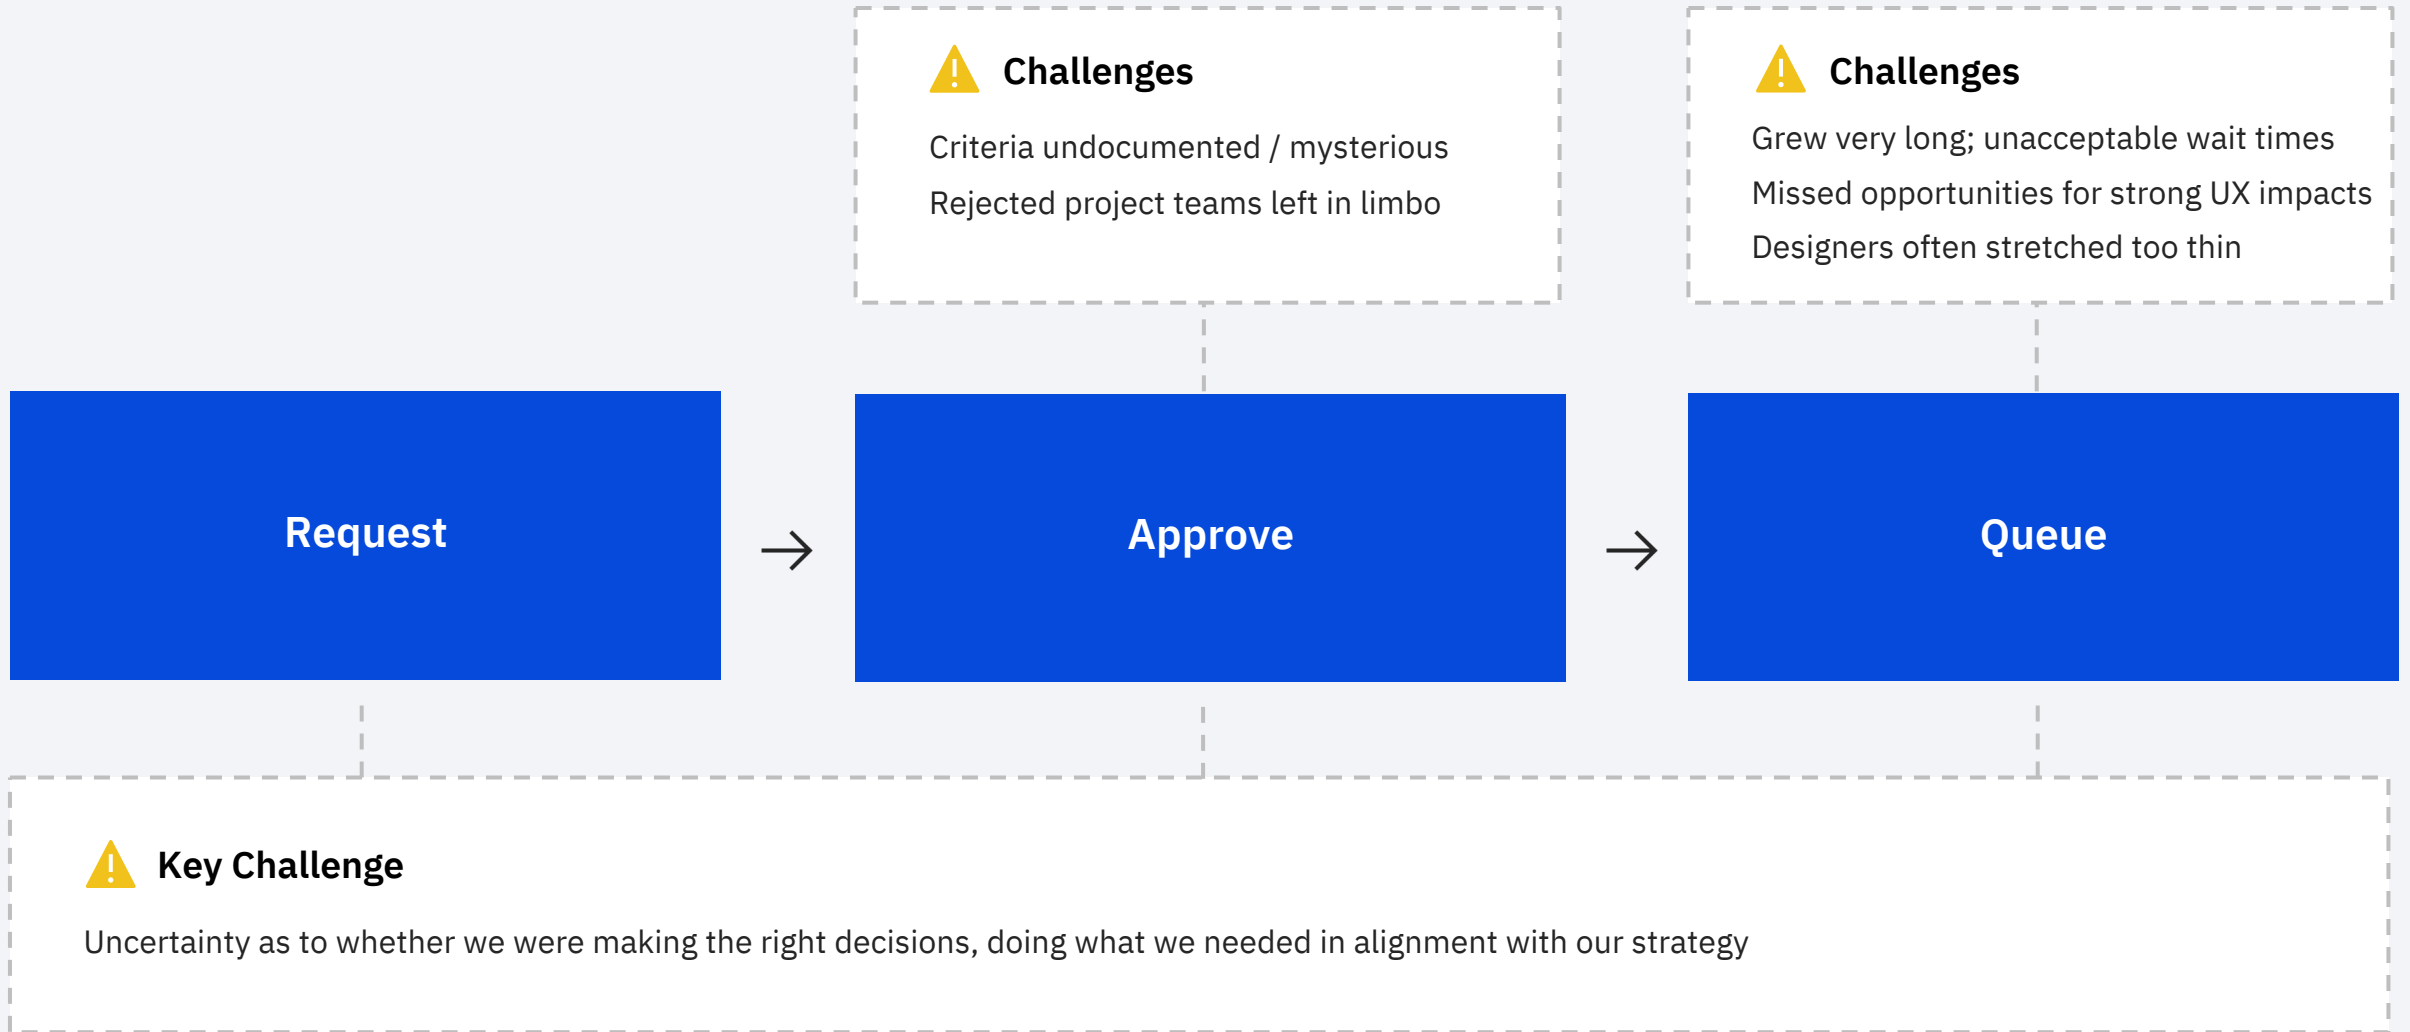

Recommended Design Support by Priority

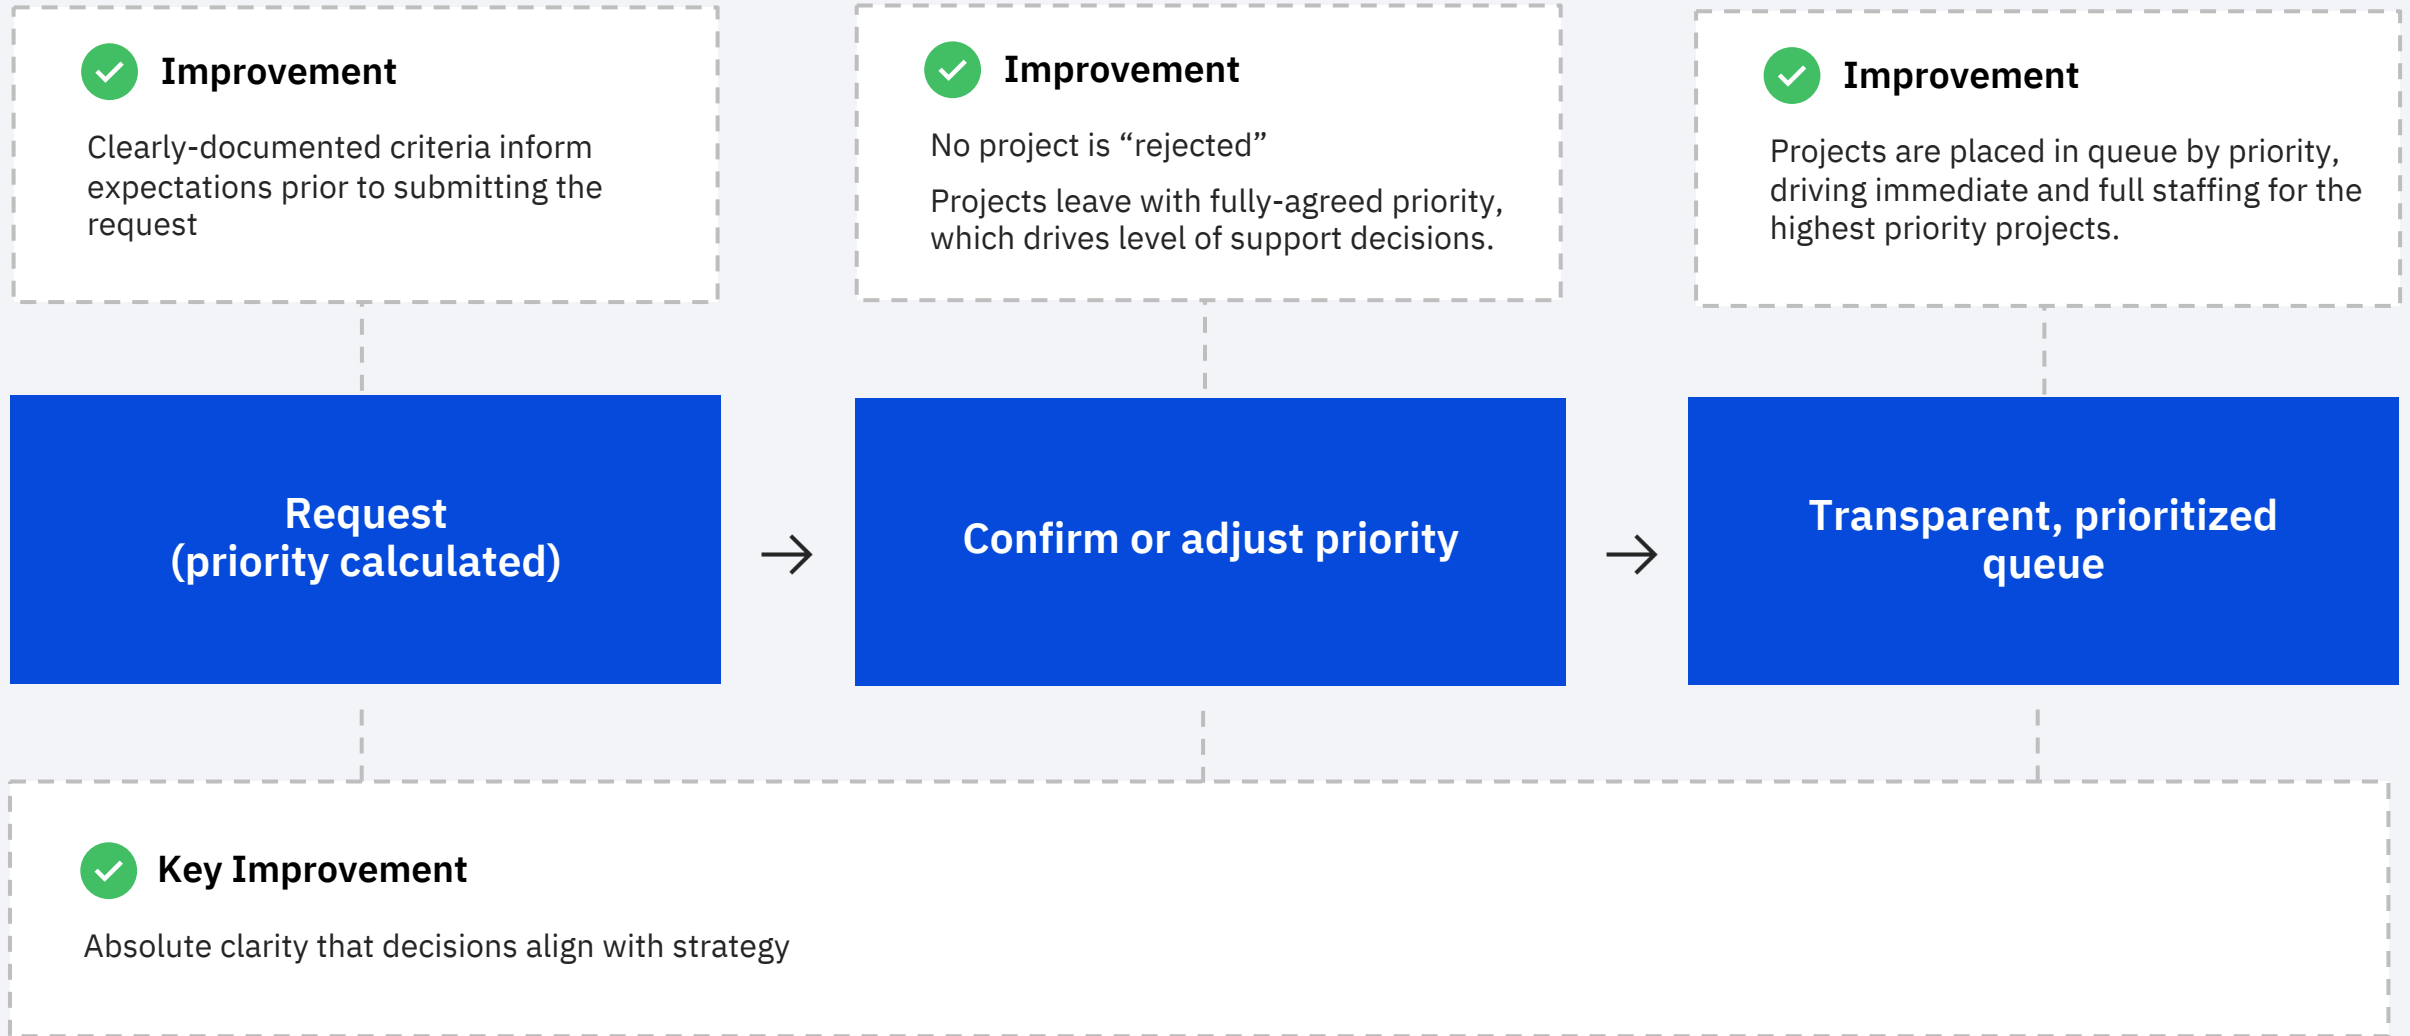

Priority	Recommended Services	Investment
1-3	Long-Term, Embedded Supplement with other services such a short-term support as needed	Months - Years
	Short-Term Support	Days - Weeks
4	Design & UX (DUX) Review	70 hours
	Rapid Design Sessions	Up to 8 hrs
4-5	Office Hours	45 min

Project Selection Process

2017 – June 2020

Skill gaps inform recruiting

Initial Collection

Many hours, many people

Now

We maintain accurate staffing records and click a button weekly

Clear improvement in alignment with our strategy

Keeping our eye on the prize

Applying to your org

Taking a similar approach within your organization

1

Start with your mission, strategic focus areas, and goals

2

Align on key, objective metrics that will drive prioritization

3

Weight if appropriate & map metrics to priority levels

4

Form decision-making body and process for priority adjustments

5

Revisit and modify your approach as beneficial

6

Communicate & stay transparent throughout

Thank you
