**... and more!**

**+ New Skill Category**

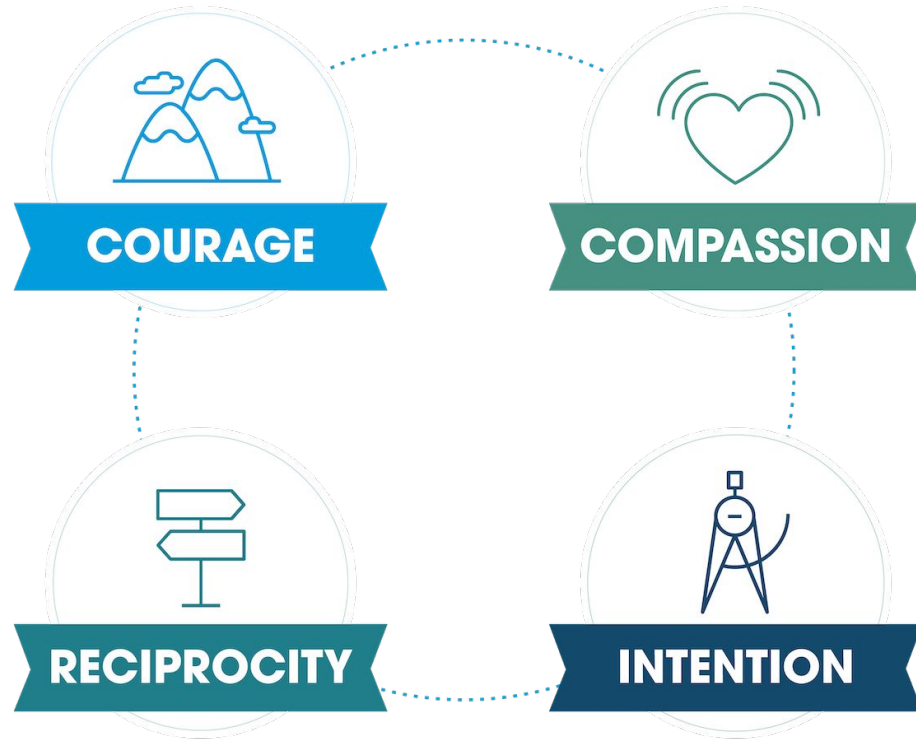

## New Skill Category: Relationship Design

“Relationship Design is a creative approach to driving business and social value, focused on building relationships with customers, employees, and community.”

- Justin Maguire, Chief Design Officer

[Blog Post: Building Relationships By Design](#)

[Blog Post: Building Relationships By Design](#)

# Relationship Design

## Associate

Expresses gratitude and appreciation to those who offer help.

## Principal Architect or Vice President

Goes beyond project-driven interactions to build meaningful ongoing relationships with stakeholders.

# Relationship Design

## Associate

Tries new things, including when failure is a possibility. Learns from mistakes and can articulate lessons learned.

## Principal or Director

Holds difficult conversations about worst-case scenarios. Questions projects, processes, and assumptions that may be harmful to others, especially underrepresented groups.

# Relationship Design

## Associate

Words and actions are consistent. Follows through on commitments.

## Principal Architect or Vice President

Uses their power within the organization to elevate the voices of underrepresented people – for example, by mentoring or through pair-designing on a high-visibility project.

# Relationship Design

## **Lead or Senior Manager**

Demonstrates empathy for partners, seeking to understand their needs and contextualize feedback from their points of view.

## **Architect or Senior Director**

Acknowledges organizational power dynamics, including personal and intersectional privilege. Shares power to benefit the undersupported and underinvested.

**But how did we get  
this all done?**

# Best Practices: Editing Process

## Get Many Perspectives

Interviews

Volunteers

Discipline owners

## Don't Be Too Prescriptive

Back + forth discussions

Use the time you have

Final review

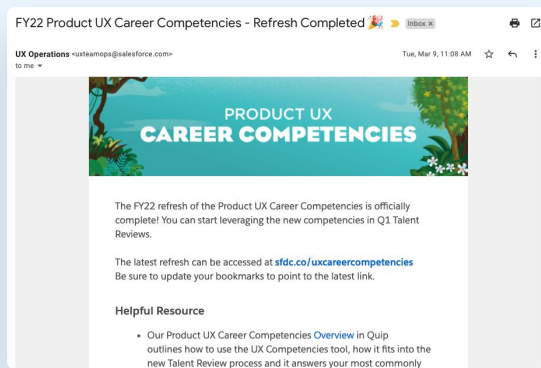

## Be Perceptive

Mindful of the number  
of changes

# Best Practices: Roll-out Changes

## Resource Guide

## Release Campaign

## Live Walkthrough + Q&A

# Outcomes: Manager Testimonials

## Ensure Consistency

“Everyone across the organization are looking at a similar set of standards: these give me a balance for **repeatable conversation over time with my team. And I know that other managers are doing similar things with their team.**”

## Celebrate Individualism

“We’re all differently shaped humans, with different skills. Being mindful of equity, being inclusive of how people show up differently, makes it a tool that can flex, so we don’t have to deliver in the same way for everyone. **We create a shared foundation, but everyone can deliver on it differently.**”

## Consider Opportunities

“It’s a reflection back to me [as the manager], **am I giving equal opportunities where I can elevate my team for visibility to demonstrate specific skills? We have the talent here. [Managers] need to give them the opportunities to show that they have it.**”

# Final reminders...

- Okay to start small.
- Conversation starter; all skills not required for promotion.
- Continue to gather data and commit to further change.

# Thank You.
